## PROJECT

### 1. YouTube clone App ([GITHUB](#))

React Js | Frontend | Rapid API | CSS

A YouTube web application that uses rapid API to provide sets of endpoints to perform actions such as retrieving video information, managing playlist and accessing user data.

### 2. Sticky Notes App ([GITHUB](#))

React Js | Express Js | MongoDB | Node Js | CRUD

I developed a dynamic full-stack sticky notes application, seamlessly integrating a responsive front end with a robust back end. Users can create, edit, and organize digital notes, enhancing productivity and organization in a user-friendly interface.

### 3. News App ([GITHUB](#))

React Js | Frontend | News API | CSS

News web application that uses News API to explore articles, videos, update across various categories. Responsive design and search functionality enhance the user experience

### 4. Blog App ([GITHUB](#))

React Js | Express Js | MongoDB | Node Js | CSS

Crafted a React blog app with functionality in the backend, enabling users to Create, Read, and Update posts. Implemented secure authentication for users, enhancing the blogging experience with seamless interaction and data management.
